Let US Connect you.

In today's world, searching for up-to-date, quality information on health topics can be overwhelming. The information is out there, but finding it can be a difficult task. That's why the NICHD Information Resource Center is here—to connect YOU to the health-related information you need, quickly and easily.

IT'S easy TO get Connected.

The NICHD Information Resource Center offers five quick and easy ways to get the information you need.

- Call us, toll free, at (800) 370-2943 and let our trained Information Specialists assist you.
- Access the NICHD Web site, <http://www.nichd.nih.gov>, where you can make information requests, read articles and publications online, and print the materials you want.
- E-mail us at NICHDInformationResourceCenter@mail.nih.gov with your request.
- Fax us your information request at **1-866-760-5947**.
- If you're not in a hurry, mail us your request at **P.O. Box 3006, Rockville, MD 20847**.

The mission of the NICHD is to ensure that every person is born healthy and wanted, that women suffer no harmful effects from reproductive processes, and that all children have the chance to achieve their full potential for healthy and productive lives, free from disease or disability, and to ensure the health, productivity, independence, and well-being of all people through optimal rehabilitation. To reach these goals, the NICHD:

- Conducts and supports laboratory research, clinical trials, and studies with people that explore health processes. NICHD researchers examine growth and development, biologic and reproductive functions, behavior patterns, and population dynamics to protect and maintain the health of all people.
- Examines the impact of disabilities, diseases, and defects on the lives of individuals. With this information, the NICHD hopes to restore, increase, and maximize the capabilities of people affected by disease and injury.
- Sponsors training programs for scientists, doctors, and researchers to ensure that NICHD research can continue. By training these professionals in the latest research methods and technologies, the NICHD will be able to conduct its research and make health research progress until all children, adults, families, and populations enjoy good health.
